

AXSDry is a complete set of online tools and databases designed for the dry bulk shipping industry. Hundreds of operators, brokers, charterers and financial institutions save time and effort by pooling their key information in one place. Members agree they make better decisions by easily interacting data with our powerful assessment and analysis tools. AXSDry enables you to have a complete view of the dry bulk shipping market – without having to sort through thousands of e-mails, or manage multiple programs on your desktop.

Special Edition: AXSDry Vessel Manager

We thank you for all the helpful feedback you've provided on AXSDry Vessel Manager over the last months. With your input and suggestions in mind, our R&D team has introduced new functions. We hope these will further enhance your satisfaction with our offer!

AXSDry Vessel Manager's enhanced features & functions

- New real time search/pushed search function, which helps you track which vessels are out/in or static within your standard search results.
- 'Set as fixed' function now available in the first right click, making it easier to use.
- Numbers of vessels in search result list now shown in bold.
- Column sort function clearly seen; cursor changes to a hand over column headings.
- When adding a vessel to a list (shortcut key 'A'); scroll immediately to the added vessel.
- QuickUpdater date entry now consistent with entry method used in AXSTracker (parse).
- Search filter: gears/grabs and cranes section now shows search on 'All' combinations.
- 'Private Comments' in the comments column header.
- Comments tab now available at bottom panel: see the comment history without having to click into the comment section.
- In the vessel spreadsheet, you now see how many files have been attached to any particular ship.
- New 'Pos Hist Msg' tab at the bottom panel showing historical source messages; available when attached to position updates.
- IE tabs show the system module to ease your navigation when using multiple windows.
