For Immediate Release – April 29, 2008

AXSMarine announces launch of AXSS&P

New solution for ships sales and purchase professionals developed jointly with Lorentzen & Stemoco

Paris, France, April 29, 2008 – AXSMarine, provider of online databases, reference guides and tools enabling shipping industry professionals to transform raw data into useful, searchable, easily manageable information, **announces the creation of AXSS&P, its new Sales & Purchase solution.**

AXSS&P is a secure, web-based and very complete Sales & Purchase system. It was designed in conjunction with the S&P department of leading Oslo-based broker Lorentzen & Stemoco, who is now one of two main brokers using the product in its full capacity.

With AXSS&P, all individual vessel data is available to subscribers on one easy-to-view screen. Full integration with Microsoft® Outlook® is available using plug-ins, including address book functionality.

“AXSS&P is easy to learn and easy to use,” notes AXSMarine Commercial Director Stephen J. Fletcher, “Users can seamlessly migrate their historical vessel technical data and commercial history from their current system, no matter which one they are using now. Alternatively, they can utilize AXSMarine’s default vessel technical databases, and then securely enter and retrieve their own private data.”

AXSMarine can act as a “pass-through” for any other vessel database subscriptions held today. Links are provided to Equasis and other selected public data sources.

Companies wishing to benefit from a free trial of AXSS&P should contact AXSMarine. The company will be demonstrating this new solution, along with its entire product offering, at **Posidonia, on stand 727.**

About AXSMarine

AXSMarine produces a complete set of interactive, Internet-based decision-making tools and databases which support all commercial ship chartering activities. Our products and solutions are purpose-built for shipbrokers, operators, owners, charterers, research firms and financial institutions, using state-of-the-art Internet technologies.

AXSMarine online tools are secure, fast and easy to use, and the databases they source are always up to date. Because they are Internet based, our services are available from any computer, anywhere. There is never anything to download or install.

AXSMarine subscribers can transform a massive overload of raw text data into useful, searchable information. As a result, they enable you and your teams to make faster decisions and smarter choices by easily interacting your own information and market data with our powerful, easy-to-use assessment and analysis tools.
