## AXSDry Distance Calculator

DISTANCE TABLE V2 Distance Server status: Running

Port	Port	d. in port	Via	Speed	Distance	Days
Dalrymple Bay	Rotterdam		Suez Gibraltar	13	11472	36
Rotterdam			PanamaCanal	13		
			GoodHope	13		

search reset departure: 16/01/2006 arrival: 21/02/2006 Total 11472 36

Results

From	To	via	distance
Dalrymple Bay	Rotterdam	Suez Gibraltar	11472
Dalrymple Bay	Rotterdam	PanamaCanal	12764
Dalrymple Bay	Rotterdam	GoodHope	14032

ECOLE DES MINES DE PARIS  
CENTRE DE RECHERCHES NAVIQUES

- Complete data from over 9,000 ports, with 50,000 potential waypoints and 97 potential nautical routing points
- Used by more than 300 shipping professionals around the world
- User-friendly interface: simply plug in your data and immediately get results
- Accessible from any computer anytime: you just need an Internet connection

- Estimate voyage durations, return distances and return time on a variety of routes and even at different hypothetical speeds.
- The large number of nautical waypoints allows for great flexibility in studying potential routes and can take into consideration closed canals or passage points.
- Distances are calculated "on the fly," which means every member benefits from the most updated information, data and feedback.
- Commercial rules are taken into account: for example, unlike any other distance calculator, ours will not calculate any voyage that would sail below 40° S latitude.
- Incredibly flexible and reactive to change. Because we do all of our development in-house, new ports, routing points or waypoints can be added upon request.
- Fully interactive with the AXSDry Vessel Positions and AXSDry Voyage Estimator modules.

AXSDry is a complete set of high-performance professional tools and up-to-date knowledge databases designed for the **dry bulk shipping** industry. The community of subscribers (operators, brokers and charterers) saves time and effort by pooling their information so that everything they need is in one place. Members can make better decisions and smarter choices by easily interacting data with our powerful assessment and analysis tools.
